

## Put Success In Your Way

Wiggle in productivity. Do those baby steps whenever you can without hesitation.

Do the things you're learning, don't just accumulate the potential.

Make a plan. Keep it simple. Keep it something that you can do, but goes just over where you are now.

Know what you want. Define what is enough so you're not chasing what others expect.

It's a short staircase to success. It's simple, but not easy.
